

Course Instructors

Jon Solberg, MD, FACEP, FAWM, DiMM

Dr. Jon Solberg, Fellow-American College of Emergency Physicians, Fellow-Academy of Wilderness Medicine, is a US military-trained, board certified practicing Emergency Physician with expertise in Wilderness and Expedition Medicine. Dr. Solberg is an instrument rated tailwheel pilot with backcountry flying experience. He has earned a Diploma in Mountain Medicine, provided emergency medical care in a variety of austere environments including a combat support hospital in Afghanistan, track-side of the AMSOIL Championship Snocross Professional Snowmobile Racing Series, and on expeditions to Greenland, Alaska, South Africa, and Botswana. He is a University of North Dakota Alumni and the UND Department of Emergency Medicine Chairman. Dr. Solberg has taught multiple Wilderness Medicine Courses.

Justin Reisenauer, MD, FACEP, AWEP, AME

Dr. Justin Reisenauer, Fellow-American College of Emergency Physicians and Advanced Wilderness & Expedition Provider, is a UND School of Medicine graduate, board certified practicing Emergency Physician, with expertise in Emergency, Wilderness, and Aviation Medicine. He is a Senior Aviation Medical Examiner who is also an active and current instrument rated commercial pilot with his tailwheel endorsement. Dr. Reisenauer has completed several rim-to-rim expeditions of the Grand Canyon and catamaran expeditions in the Bahamas. He is an avid outdoorsman, as well as scuba diver. Dr. Reisenauer is a lifelong educator, serving 12 years as the Emergency Medicine Education Director at his local hospital. He has taught several Wilderness Medicine Courses, and has given numerous lectures on Aerospace Medicine, trauma, resuscitation, airway management, and others.

Pilot First Aid and Survival Course Description

Details:

Do you have a first aid or survival kit in your plane? Do you know how to use it? Do you wish you had one? Don't miss this amazing opportunity to learn about aviation emergencies, first aid, and backcountry medicine from two experts. Not only will you learn critical thought processes and techniques, you will have many opportunities to apply this newfound knowledge with hands-on training. This will be a highly interactive hands-on, real-world, simulation-based experience! Guaranteed to be educational and fun! Spots are limited, reserve yours today! Onsite showers, restrooms, kitchen, and building available.

Optional: FLY-IN or drive-in the day before and camp out under your wing! Share your aviation adventures with other like-minded pilots.

Audience:

All pilots interested in learning how to plan for, mitigate, and address life threatening injuries in austere environments and unplanned landings; learning and applying a stepwise approach to aviation medical emergencies that could save the life of you and your passengers.
