# MANNED AERIAL APPLICATORS

## OWNER/OPERATOR
## Part 137

- The owner/operator is the person who should complete the ND Aerial Applicator License.
- They are the holder of the FAA Part 137 (Dispensing Chemicals) and will supply a copy.
- They do not have to be a pilot.
- Either the owner (or the Chief Pilot) is responsible for attending an annual safety meeting.
- Must assign a Chief Pilot who meets all qualifications (the owner CAN BE the Chief Pilot).
- Must ensure all aircraft are registered.
- Must ensure any pilots and any additional aircraft are registered throughout the year.
- Must report all acreage by December 1.

## Chief Pilot

- The Chief Pilot (who could be the owner) is responsible for all airmen.
- Must have current ND Pesticide Applicator Certification Number (with Class: Air/Ground Core)
- Must have Airmen Certificate
- Either the Chief Pilot (or Owner/Operator) is responsible for attending an annual safety meeting.
- Must produce evidence of commercial FAA license with minimum of 750 flight hours as a pilot in command, of which a minimum of 250 hours as pilot in command are in the class of the aircraft in which the sprayer will be installed and used for aerial application.
- New applicators need an affidavit of experience and hours in aircraft.

## All Pilots

- Must have current ND Pesticide Applicator Certification Number (with Class: Air/Ground Core)
- Must provide Pilot FAA Certificate Number
- Must be under direct, personal supervision of Chief Pilot if less than 2 years experience and less than 250 hours of actual aerial application.

Part 137 - Agricultural Operating Certificate
14 CFR Part 137 governs the use of aircraft, including drones, to dispense or spray substances (including disinfectants)
